

Daniel R. Moisoff

Technical Tools

JavaScript, React.js, Redux, PHP, Ruby, Ruby on Rails, SQL, Git, HTML5, CSS3, Kibana.

WORK EXPERIENCE

Full-Stack Software Engineer at Wayfair

FEBRUARY 2019 — PRESENT | BOSTON, MA

- Created Bid Room Manager for suppliers to competitively bid and win coveted shelf space during sales events like Daily Flash Deals and Black Friday.
- Updated our Promotions Dashboard with alerts and updates on sales events.
- Investigated legacy code to uncover functions that were no longer needed, for example, I identified an email trigger that was no longer providing value for suppliers. Created tickets to be assigned to phase out these unused functions.
- Wrote code that identified user preferences to perform a more custom experience on the front-end. For example, based on supplier Account settings, internationally formatted dates and numbers could be displayed, allowing for more legibility and seamless integration.
- Helped create endpoints for our new API tool that allowed internal cross-functional teams to interface with promotional data. I also refactored our current code to pull information from the API rather than querying it from the database.
- Review code and give constructive feedback; engage in an agile workflow, sprint planning, and daily standup; participate in critical rotations to address potential bugs; write release notes; address and complete tickets.

Software Engineering Program Instructor at App Academy

OCTOBER 2018 — FEBRUARY 2019 | NEW YORK, NY

Teach beginner-to-advanced level JavaScript to aspiring developers, providing a strong programming foundation for students.

Color Editor at The Mill

JANUARY 2016 — FEBRUARY 2018 | NEW YORK, NY

Color corrected client film projects, including commercials, TV shows, and feature-length films. Responsible for managing workflow, asset delivery, and data systems.
